

# Spécialité de Master « Optique, Matière, Plasmas »

Stage de recherche (4 mois minimum, à partir de début mars)

Proposition de stage (**ne pas dépasser 1 page**)

Date de la proposition :

<b>Responsable du stage / internship supervisor:</b>			
Nom / name:	Fuchs	Prénom/ first name :	Julien
Tél :	0169335407	Fax :	
Courriel / mail:	julien.fuchs@polytechnique.fr		
<b>Nom du Laboratoire / laboratory name:</b> Laboratoire pour l'Utilisation des lasers intenses			
Code d'identification :	UMR7605	Organisme :	CNRS
Site Internet / web site:	http://www.luli.polytechnique.fr/accueil/le-personnel/equipes-de-recherche/sources-de-particules-de-rayonnement-intenses/		
Adresse / address:	Ecole Polytechnique, Palaiseau (91)		
Lieu du stage / internship place:	Ecole Polytechnique, Palaiseau (91)		

<b>Titre du stage / internship title:</b> <b>Magnetized laboratory astrophysics</b>
Résumé / summary
<p>The overall project aims at addressing astronomy-relevant issues related to the coupling of expanding and colliding plasmas with dynamically important magnetic field. In particular (1) the collimation of compressible, magnetohydrodynamic flows by a magnetic field, and (2) the production of energetic particles and radiation by collisionless shocks or magnetic reconnection events, will be tackled. The possibility to study all these effects in the laboratory is a great opportunity to bring significant new results to compare with existing observations (e.g. collimated astrophysical jets, the production of high-energy particles in GRBs) and to simulations of these phenomena. For this, the project will take advantage of newly available experimental capabilities (high-power lasers coupled to pulsed strong magnetic fields) and exploit the results using 2D and 3D hydrodynamic, MHD and kinetic numerical simulations to get a complete picture of the phenomena. The intern will participate to various levels in this program, including an experiment that will be performed at LULI (Ecole Polytechnique), and possibly MHD simulations of the measured phenomena.</p>
<b>Toutes les rubriques ci-dessous doivent obligatoirement être remplies</b>

<b>Ce stage pourra-t-il se prolonger en thèse ? Possibility of a PhD ? : OUI</b>			
<b>Si oui, financement de thèse envisagé/ financial support for the PhD: bourse EDX</b>			
Lasers, Optique, Matière		Lumière, Matière : Mesures Extrêmes	
Plasmas : de l'espace au laboratoire	X		

Fiche à transmettre (fichier pdf **obligatoirement**) sur le site <http://stages.master-omp.fr>
